

## **Annex 1 to the Guidelines on the Accessibility of IT Tools Accessibility Statement Template for Websites and Mobile Applications of the Entities Referred to in Article 3, Paragraph 1-bis of Law No. 4 of January 9, 2004**

QNT S.r.l. a Socio Unico is committed to making its website accessible, in accordance with Law No. 4 of January 9, 2004. This accessibility statement applies to <https://www.simplebooking.travel>.

### **Compliance Status**

Questo sito web è parzialmente conforme ai requisiti previsti dall'appendice A della norma UNI CEI EN 301549 in ragione dei casi di non conformità e delle deroghe elencate di seguito.

### **Non-accessible Content**

The content listed below is not accessible for the following reasons: non-compliance with Law No. 4 of January 9, 2004

- **1.4.3 - Contrast (Minimum):** In some sections, the contrast between the text and background may not meet the recommended minimum levels, making it difficult for some users to read.
- **2.1.1 - Keyboard:** Some functions are not operable via keyboard (or similar input interface).
- **2.4.7 - Focus Visible:** Some interactive elements do not show a visible focus indicator.
- **2.4.3 - Focus Order:** On some web pages where navigation order affects meaning or functionality, focusable elements may not follow a logical sequence.
- **1.3.1 - Info and Relationships:** In some sections, information, structure, and relationships conveyed through presentation may not be programmatically determined or available in text for assistive technologies.
- **2.4.1 - Bypass Blocks:** There is currently no mechanism to skip repeated blocks of content like navigation menus or headers.
- **2.4.6 - Headings and Labels:** In some cases, headings and/or labels do not sufficiently describe the purpose or function of elements.

- **4.1.2 - Name, Role, Value:** Some user interface components (e.g., form elements, links, script-generated components) lack proper name, role, states, properties, or values, or changes are not communicated to assistive technologies.
- **2.4.4 - Link Purpose (In Context):** The purpose of some links may not be determined from the link text alone or its context.
- **2.5.3 - Label in Name:** Some visual labels are not included in the accessible name, making it harder for voice-based assistive technology users to understand.
- **3.3.2 - Labels or Instructions:** In some cases, labels or instructions are missing when user input is required.
- **2.2.2 - Pause, Stop, Hide:** Certain automatically triggered animations, blinking, scrolling, or updating information lasting more than 5 seconds lack a mechanism to pause, stop, or hide them.
- **3.3.1 - Error Identification:** Input errors may not always be clearly indicated and described to the user.
- **3.3.3 - Error Suggestions:** When input errors are identified and correction suggestions are known, they are not always provided to the user unless this would compromise the content's security or purpose.
- **1.1.1 - Non-text Content:** Some non-text content lacks an equivalent text alternative serving the same purpose.
- **1.4.5 - Images of Text:** Alternative text is not always provided or consistent with the images' content.
- **1.4.1 - Use of Color:** In some sections, color alone is used to convey information or distinguish elements without text or other indicators.
- **1.4.12 - Text Spacing:** In some sections, line height, letter spacing, word spacing, and paragraph spacing may not allow for sufficient user customization without content loss or functionality issues.
- **1.4.13 - Content on Hover or Focus:** Additional content triggered on hover or focus may not be dismissible, hoverable, or persistent as per specifications.
- **1.3.2 - Meaningful Sequence:** Where the order of content affects meaning, this is sometimes visual only and not structured in code. Documents may also lack meaningful sequencing.
- **2.5.8 - Target Size (Minimum):** The size of some interactive targets (e.g., buttons or links) may not meet minimum size requirements, making them hard to activate for users with motor disabilities or imprecise touch inputs.
- **1.4.11 - Non-text Contrast:** Essential components, including in various states, may not meet the required 3:1 contrast ratio against adjacent elements.

## Preparation of the Accessibility Statement

This statement was prepared on June 16, 2025.

The information in this statement was obtained through self-assessment by the service provider, based on both objective and subjective analysis (see Article 3, Paragraph 1, of EU Implementing Decision 2018/1523).

## How to Submit Reports and Contact Details of the Service Provider

If you wish to contact the website owner, please write to:

[accessibility@simplebooking.it](mailto:accessibility@simplebooking.it).

## How to Submit Reports to AgID

If you receive an unsatisfactory response or no response within thirty days of submitting a notification or request, you may report the issue to AgID via certified email (PEC) at the following address: [protocollo@pec.agid.gov.it](mailto:protocollo@pec.agid.gov.it).

## Website Information

1. Date of publication: **April 21, 2022**
2. Usability tests performed: **Yes**
3. CMS used: **Custom headless**

## Organization Information

1. Number of employees with disabilities: 1
2. Number of workstations adapted for employees with disabilities: 0

## Additional Notes

- **Planned updates:** This statement will be progressively updated as the website improves its compliance with WCAG 2.1 AA guidelines.
- **Next steps:** Development work is underway to address the identified non-conformities, prioritizing elements that most impact the user experience of people with disabilities.
- **Legal reference:** This statement is drafted in accordance with Law No. 4 of January 9, 2004, and the AgID Guidelines on the Accessibility of IT Tools.
